

MySQL DATABASE SERVICE

MySQL Database Service delivers the world's most popular open source database as the only cloud service 100% developed, managed, and supported by the MySQL Team. Built on the latest MySQL 8.0 Enterprise Edition, the database service includes best-in-class enterprise features for the highest levels of MySQL performance, security, and uptime. Unlike proprietary forks available in other clouds, MySQL Database Service is 100% compatible with on-premises MySQL for a seamless transition to cloud, on-premises, and hybrid deployments. Oracle Gen 2 Cloud infrastructure delivers a highly secure and integrated environment enabling businesses to easily deploy modern applications globally with a secure, managed, and supported MySQL Database Service.

KEY FEATURES

- 100% developed, managed, and supported by the MySQL Team
- Fastest availability of updates, new features, and security fixes
- Proven MySQL Enterprise Edition features for the highest reliability, security, and uptime
- Advanced database security, including encryption, data masking, firewall, and auditing
- Fully managed cloud service with automatic backups, patching, and monitoring
- Quick provisioning of high performance database instances
- 100% compatibility with on-premises MySQL deployments
- Tight integration with Oracle IaaS and Oracle PaaS on Oracle Gen 2 Cloud
- Unified 24/7 Premier Support backed by the MySQL Engineering Team

EASE OF USE

Easy Database Administration and Lifecycle Management.

Reduce administrative efforts from provisioning and patching to monitoring with a fully managed service that automates labor intensive and time-consuming database administration tasks.

Ready for Developers. Leverage a full development-ready service infrastructure with the latest features, so developers can focus on building apps instead of managing databases.

Simple Management Interface. Manage and monitor the entire environment using a single pane of glass.

Seamless Path to Cloud and Hybrid Deployment. Easily move workloads between on-premises deployments and cloud using the same database with 100% compatibility.

SECURITY AND COMPLIANCE

Strong Protection of Corporate Data with Multilayered Security.

Protect your data with MySQL enterprise-grade security features such as Audit, Authentication, Encryption, Transparent Data Encryption, and Firewall.

Always Up-to-Date with the Latest Security Fixes. Rapidly get the latest MySQL security updates from the MySQL Team to limit your exposure to security vulnerabilities.

Advanced Security Features to Meet Regulatory Requirements.

Access built-in MySQL security features to meet governments' data privacy laws and regulatory requirements for GDPR, HIPAA, etc.

Unmatched Security with Oracle Gen 2 Cloud. Leverage the only zero-trust architecture where tenants are isolated from one another. Its core infrastructure includes encryption everywhere, least privilege identity, access management, as well as granular resource and network control all the way.

ENTERPRISE READY

100% Developed and Managed by the MySQL Team. Obtain updates, new features, and security fixes faster with a tight feedback loop to the MySQL Engineering Team.

100% Supported by the MySQL Team. Get the highest level of MySQL expertise. MySQL Support together with Oracle Premier Support provide a unified 24/7 solution for both cloud infrastructure and MySQL. No other cloud vendor can deliver such comprehensive support for the MySQL database.

100% Built on MySQL Enterprise Edition. Deliver the highest levels of MySQL performance, security, and uptime with the only public cloud service built on MySQL Enterprise Edition.

Best Integration with Oracle Tools and Technologies. Leverage a service fully integrated with Oracle technologies such as Oracle Golden Gate, Oracle Data Integrator, Oracle Audit Vault, Oracle Container Engine for Kubernetes, Oracle Analytics Cloud, and more.

KEY BENEFITS

Increase Business Agility. Leverage a fully managed MySQL service to focus business resources on innovation instead of database management.

Ensure Highest Levels of Security, Performance, and Uptime. Rely on the only MySQL Service that includes best-in-class enterprise features from the MySQL Enterprise Edition.

Easily Move Workloads to the Cloud. Operate seamlessly between on-premises, cloud, and hybrid architectures with the only 100% compatible MySQL version in the cloud.

Get the Highest Level of MySQL Expertise. Work with the only cloud platform that is developed, managed, and supported by the MySQL Team.

Reduce Total Cost of Ownership. Save on infrastructure and database management operational costs with a fully managed service.

Improve Productivity of IT Talent. Decrease time wasted on infrastructure maintenance with a fully managed service that includes automatic updates for the latest features, security, and fixes.

Provide a Development Ready Platform. Get your developers up and running faster with a preconfigured and set up database environment.

Leverage Fully Integrated Oracle Technologies on Oracle Gen 2 Cloud.
